University antiplagiarism system: how to submit a document

maggio 2022

A tool to support writing practice

The anti-plagiarism service, active for some years at our university, is used by students and professors to verify the correctness of the diissertations of degree and doctoral theses and for other types of documents.

In our University, however, it is not mandatory for everyone and each department regulated independently for the access to the service. However, there are some fundamental guidelines for uploading the document: currently the software is used through the Usienaintegra platform and the student receives instructions for uploading by email.

Upon assignment of the thesis or in any case following the request of the teacher, you will receive an email notification of the creation of the space for uploading your paper. The teacher and the competent student office are also made aware of this communication.

There are two uploading methods: a) the **normal version**, consisting of a single area from which to proceed with the upload of the final version of the thesis (including the title page, in the format that will be discussed) and b) the **expert version**, consists of 5 different uploading areas where you can insert single chapters or subsequent versions of the same file document for correction during the drafting phase. In this case only the last section, called "Final version", will be used for the analysis generation of the complete "originality report" after the check.

The accepted formats are many, even if usually PDF or word / openoffice files are uploaded

Accepted file types and sizes Allow any file type

If an assignment is set to allow any file type, Turnitin will accept any file:

- that is less than 100MB;
- that has a minimum of 20 words; and
- that is less than 800 pages.

File types checked for similarity

If the assignment is set to allow only file types that Turnitin can check for similarity, Turnitin will only accept files that can generate Similarity Reports.

This includes:

HTML Hangul Word Processor file (.hwp) Rich text format (.rtf) Plain text (.txt) Google Docs via Google Drive[™]

If submitting with Google Drive[™], third-party cookies must be allowed in your browser, otherwise, any attempts to sign into Google to upload from Google Drive will fail. functionality is not supported in IE8 or below.
